

【Urgent notice】Preventive measures against the spread of new coronavirus infection

Thank you very much for using our ship.

As a measure to prevent the spread of the new coronavirus infection, and to ensure that our customers receive the service with confidence, we will conduct temperature measurement for all passengers on board.

Therefore, it is expected that more time will be required before boarding procedures, so please come to the port early.

In addition, if you cannot cooperate with the temperature measurement, or if the temperature measurement shows a fever of 37.5 ° C or more, it will be regarded as a symptom with a new infectious disease, and we will refuse to board the ship. (Contracts of Carriage Passenger Transportation, Chapter 2, Article 3).

- Implementation period April 13, 2020 (Monday) ~ For the time being
- Implementation location Near the port window
- Target person All passengers on board
- Implementation content Temperature measurement before boarding procedure at boarding port

(1) At the temperature measurement corner, the temperature is first measured with a non-contact thermometer, and depending on the measurement result, the temperature will be measured again with a more accurate contact rod thermometer.

(2) We ask that customers other than the procedure representative also come to the temperature measurement corner and have the temperature measured.

(3) After the temperature has been measured, you will be stamped out on the boarding application, so please complete the application on the boarding application.

(* Please note that the boarding procedure will not be performed on a boarding application form without a "Seal".)
